Office Action Summary

PART III: REASONS FOR REJECTIONS AND OBJECTIONS

The following is a quotation of the appropriate paragraphs of 35 USC 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 rejected under 35 USC 102(b) as being clearly anticipated by Gombrich et al.

Applicant's arguments filed December 31, 2001, have been fully considered but they are not deemed to be persuasive.

Applicant's request that "the Examiner explicitly specify, for each rejected claim, where each and every element of the claim was taught or suggested by the cited reference" has been addressed in a previous office action, and will receive no further comment.

Applicant argues that "Gombrich does not disclose providing, automatically, in response to subsequent accesses by a user a list of products previously ordered by the user." Applicant's attention is directed to column 16, lines 49-57, in Gombrich which states "Additionally, the bar code reading device will preferably store a record of the most recently administered PRN or other controlled drug administered to control pain or the like and the times they were administered. This eliminates the need to track down the patient's records, which is an important benefit in times of emergency." This means that when the user enters an order for a subsequent prescription, the system automatically provides a list of previously ordered drugs, thus meeting the claim limitation. Applicant's argument that different people are accessing the prescription data is unconvincing. Each of the users named in Gombrich can access that system multiple times. There is no restriction in Gombrich that the separate steps be performed by different people. They could all easily be performed by the same person.

Applicant argues that Gombrich has no disclosure of a reordered product being shipped. Prescriptions are frequently reordered and such is inherent in Gombrich. Also, prescription drugs are useless if they are not delivered to the patient, so that too is inherent in Gombrich.

Applicant argues that Gombrich does not disclose an electronic commerce World Wide Web page. The claim limitation in question says "instructions stored thereon to implement an electronic World Wide Web page." Gombrich clearly discloses a computer display for ordering products on a network. Since the products in Gombrich are being billed and paid for, it clearly constitutes electronic commerce. The World Wide Web is a network. Gombrich discloses a network. The World Wide Web is a network that has been

in existence for several decades. Gombrich could clearly be used on the World Wide Web if the people using it so desired. "Page" merely refers to a display screen. Again, Gombrich has that feature.

Applicant further states that Gombrich does not have a server. See figure 14 of Gombrich for reference to a server.
